Commercial Applicants:

1. Please describe the commercial operations to be served

2. Will these operations place unique, non-standard service demands on the system or require any special facilities?
 NO YES if yes please describe:

The Utility agrees to sell and deliver water to the customer and the customer agrees to purchase and receive water from the Utility in accordance with the rules and regulations of the Utility as included in its approved Tariff on file with the Utility and the Commission on Environmental Quality. All water will be measured by meters which are furnished, installed, owned and maintained by the Utility. The meter and/or connection are for the sole use of the customer to serve water to one dwelling, business, property, etc., without the specific written authorization of the Utility and in compliance with applicable laws and regulations. The Utility has the right to locate a water service meter and the pipe necessary to connect the meter on the property of the customer at a point mutually agreeable to both the Utility and the Customer. The customer will allow the Utility access at all reasonable times to its property and equipment located upon customer's premises for limited purposes of reading the water meter, repairing or replacing existing facilities and the inspection of customers facilities to check for illegal connection or unsafe plumbing practices or cross-connections, in accordance with requirements of the Texas Department of Health's "Rules and Regulations for Public Water Systems." Also, the use of pipes and pipe fittings that contain more than 8.0% of lead or solders and flux that contain more than 0.2% lead is prohibited for any plumbing installation or repair of any residential or non-residential facility providing water for human consumption and connected to the water supply.

The Customer will install, at his own expense, a service line from the water meter to the point of use which includes a cutoff valve on the customer's side of the water meter. The customer will be responsible for maintenance and repair of the service line. The Customer shall hold the Utility harmless of any and all claims or demands for damage to real or personal property occurring from the point the Customer ties on to the water meter to the final destination of the line installed by the customer. The Customer will not hold the utility liable for any damage done to customer's private property (IE. driveway, storage building, etc.) that has been built over the utilities main lines of service. The Customer agrees to grant to the Utility an easement/right of way for the purpose of installing, maintaining, and operating such pipe lines, meters, valves, and any other equipment which may be deemed necessary for provision of Utility service to that customer. This Utility will attempt to restore the Customers property to its original condition after installation or repairs. The easement may be in such form as is required by the Utility. The customer agrees not to interfere with the Utilities employees in discharge of their duties. The Customer will not permit anyone except the Utilities employees to tamper with or interfere with any of the equipment installed on the Customers premises.

HILCO H2O Water Company is given permission to obtain a consumer credit report to check my credit standing.
